Bengaluru, India | +91 7258025793 | surajkumar11292@gmail.com
linkedin.com/in/suraj-kumar-1b9a65250 | github.com/surajkumar11292

TECHNICAL SKILLS

Frontend:	JavaScript, React.js, Redux Toolkit, Zustand, HTML5, CSS3, Tailwind CSS
Backend & DB:	Node.js, Express.js, MongoDB, Mongoose ODM, MySQL, SQL, RESTful APIs, JWT
Architecture:	WebRTC, Socket.io, WebSockets, Peer-to-Peer (P2P), Event-Driven Sync
DevOps & Tools:	Git/GitHub, Docker, CI/CD Pipelines, GitHub Actions, Postman, Vercel, Render
AI & Integrations:	Gemini AI API, Clerk Auth, Twilio Verify (MFA), Webhooks

PROFESSIONAL EXPERIENCE

Earth Services – Full-Stack Software Engineer

Nov 2024 – Mar 2026 | [Worked](#)

- **Full-Stack Development:** Developed and maintained features for school management portals and internal CRMs using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- **Frontend Dashboards:** Built responsive student and admin dashboard screens using **React.js** and **Tailwind CSS**, streamlining admissions and attendance workflows for school staff.
- **Backend API & Database:** Created RESTful APIs to handle multi-step form submissions, securely storing and retrieving institutional records using **MongoDB** and Mongoose schemas.
- **Authentication & Security:** Implemented secure login systems utilizing **JWT (JSON Web Tokens)** and **Role-Based Access Control (RBAC)** to ensure strict data privacy across admin, teacher, and student views.
- **Real-Time Features & Payments:** Integrated **Socket.io** to push live event updates to admin dashboards and assisted in configuring **Razorpay webhooks** for automated online fee collection status tracking.

ENGINEERING PROJECTS

Chat-App | Real-Time Messaging Ecosystem [\[GitHub\]](#)

[React](#), [Node.js](#), [Socket.io](#), [Docker](#), [Clerk](#), [ImageKit](#)

Live Application: chat-app-nl36.onrender.com

- Built a MERN messaging application **containerized with Docker**, establishing **bidirectional Socket.io communication** for real-time delivery.
- Synchronized user profiles asynchronously via **Clerk Webhooks** and optimized rich-media loading via **ImageKit API integration**.
- Configured **automated background workers (cron jobs)** to reduce cold-start latency and maintain 24/7 backend availability on Render.

NoShare | Decentralized P2P File Transfer [\[GitHub\]](#)

[React](#), [WebRTC](#), [WebSockets](#), [Express.js](#)

Live Application: no-share.vercel.app

- Engineered a serverless file-sharing platform utilizing **WebRTC data channels**, eliminating server storage costs and **reducing transfer latency by 60%**.
- Architected an Express.js signaling server with an **in-memory IP rate limiter** to throttle room handshakes and block DDoS flood vectors.
- Developed **custom React hooks** (`useWebRTC`, `useSocket`) to dynamically render real-time P2P connection states and file progress.

Police-Documentation | AI-Powered Record Management [\[GitHub\]](#)

[MERN](#), [Gemini 1.5 Flash](#), [JWT](#), [Twilio MFA](#)

Live Application: digital-record-portal.vercel.app

- Developed an archival portal with **Role-Based Access Control (RBAC)**, admin approval workflows, and automated audit logging.
- Integrated **Gemini 1.5 Flash API** to parse multi-format documents (PDFs/images), automatically extracting structured case metadata into HTML.
- Implemented **Twilio Verify (SMS MFA)**, JWT authorization, and **SHA-256 cryptographic hashing** to digitally verify document integrity.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications (BCA)

2020 – 2023

Aryabhatta Knowledge University (AKU)

Certification: Web Development Course with AI

[Udemy](#)
